## CITY OF MESA APPROVED PRODUCTS LIST – Truncated Domes

### **OVERVIEW**

The City of Mesa (City) has established procedures for the review and approval of products used in the street system. All products considered for use in the street system must be reviewed and approved by the City prior to being included in the Approved Product List (APL).

Through previous investigation, usage by the City, and industry performance history, certain types, brands and models of products and materials have established a satisfactory in-service reliability record. These products have been tabulated by manufacturer's names and identifying numbers on the APL.

**Use by Design Engineers:** The APL includes products that meet the needs of most street construction projects within the City. Design engineers must however, confirm that products in the APL meet their project needs. If the project requires products of different size, material, or design than those listed in the APL, the design engineer must seek approval by the City prior to their use.

**Use by Contractors:** The APL, by itself does not constitute a submittal by the contractor. The contractor must submit manufacturer technical data sheets of sufficient detail to adequately describe the product or materials for each project. Submittals shall address all requirements contained in the APL data sheet as well as applicable project specifications. The corresponding APL data sheet should accompany the submittal for listed projects.

**Use by Contractor Submittal Reviewers:** The APL is intended to expedite reviews of product submittals made by contractors. Contractor submittal reviewers must confirm the following to ensure that products comply with the APL:

- The product meets the functional needs of the project.
- The product is of the type specified for use on the project.
- The product is in the category covered by the APL.
- The manufacturer of that product is listed on the APL.
- The product is within the size range listed on the APL.
- The model number, serial number or manufacturer designation is listed on the APL.
- The product meets all requirements in the applicable specifications, special provisions, details and construction notes in the project contract documents.

### **GENERAL NOTES AND REQUIREMENTS**

1. Contractors shall confirm that the construction contract documents for City of Mesa allow for use of products on the APL. Project-specific Special Provisions or Technical Specifications in the project contract documents may specify other products, in which case the project specifications shall govern if approved by the City.

**CITY OF MESA APPROVED PRODUCTS LIST – Truncated Domes**

2. Projects under construction shall only utilize products on the current Approved Products List. No substitutions or “approved equal” products will be allowed. Product manufacturers or representatives wishing to submit products for consideration shall follow the procedures listed in this document and furnish the requested information.
3. Standards referenced in the Approved Product List shall be the latest version of that standard, regardless of the year or date indicated.
4. After an item is approved, the product manufacturer or representative shall inform the City in writing, of any subsequent modifications in product design or material. Changes in product design or material may require further evaluation to determine continued approval of the product. Failure to inform the City of such changes may result in removal of the item from the Approved Products List.
5. The City may withdraw any approval as a result of design or material change, field observation, testing, product failure, or other factors, which, in the City’s opinion, warrant such withdrawal.
6. Projects under construction that include street system components by private developers, or other non-CIP projects shall adhere to the APL requirements and only use listed products where applicable unless otherwise approved in writing by the City.
7. Assembled products, and the materials associated with assembled products, may be subject to testing for conformance to applicable standards and manufacturer’s specifications for that product.
8. The City may limit the number of approved products for certain items that require specialized tools, training, excessive storage or reduce the efficiency of maintenance and operations activities.

**NEW PRODUCT SUBMITTAL AND REVIEW PROCESS**

New Product Submittal Checklist

Product and equipment manufacturers wishing to have a product reviewed for inclusion on the APL shall submit a complete written request to the City. This should be submitted as a single package for each product and include the following:

1. Identify the product and City of Mesa APL number to which the product would be added (if applicable).
2. Identify the Maricopa Association of Governments (MAG) Standard Specification and City of Mesa MAG supplemental standard specifications that govern the product, where applicable.
3. Describe the product, providing technical specifications, dimensional drawings, product weights and catalog information.\*
4. If the product is proposed as an addition to a current Approved Product sheet, demonstrate compliance with listed requirements in the corresponding sheet.\*
5. Indicate compliance with applicable ASTM, ANSI, IEC, UL, FM, ADA, ISO 9001 or other related standards or specifications that govern the product.\*
6. Provide an example submittal for review by the City. The example submittal shall contain the same level of detail as that provided by a contractor during construction.

**CITY OF MESA APPROVED PRODUCTS LIST – Truncated Domes**

- 7. Indicate country of origin for all product components.\*\*
- 8. Name, address and phone number of local product representative.
- 9. Product availability, delivery time, pricing and manufacturer's location. If both foreign and domestic options are offered, provide availability, pricing and delivery time for each.
- 10. Provide test results showing compliance with applicable standards, or other relevant testing information, including independent laboratory test results.
- 11. Provide manufacturer’s installation procedures for the product.
- 12. List maintenance requirements, special equipment and procedures and recommended maintenance schedules.
- 13. List a minimum of three (3) project owners (public utilities) who have the product installed and currently in use. Include project name and location, project owner’s contact name, address, and telephone number, and product application (including sizes) and number of years in use.
- 14. Provide a material safety data sheet (MSDS), if applicable.
- 15. Describe recent product revisions or improvements.
- 16. Explain how the product would benefit the City of Mesa in terms of prolonged service life, reduced maintenance, and reduced life-cycle cost compared to products now in use.

\*This information must be shown as part of the manufacturer's publicly available product literature. Separate letters or statements indicating compliance with these requirements may be rejected.

\*\*If portions of the product are cast, manufactured or assembled outside of the U.S.A, provide specific information as required for each component. If the product is primarily non-domestic and a “Domestic” option is available, manufacturers shall indicate this. If the “Domestic” option is not 100% made-in-the U.S.A., the submittal package shall indicate which components are cast, manufactured or assembled outside of the U.S.A, and the corresponding country for each.

New Product Submittals

Electronic submittals in PDF-format or other common formats (Word, etc) are acceptable. Electronic submittals (10 MB maximum) shall be made to the City at:

[Mark.venti@mesaaz.gov](mailto:Mark.venti@mesaaz.gov)

Hard-copy submittals, in addition to, or in lieu of electronic copies are also acceptable. Three (3) hard-copy submittals shall be sent to:

**Street Product and Design Review Committee  
City of Mesa Transportation Department  
Attention Mark Venti  
300 E. Sixth Street  
PO Box 1466  
Mesa, AZ 85211**
